

1. MUSHROOM GROWING KIT

It is used to grow delicious mushrooms in your home. Even if you don't have a green thumb, this process is pretty much idiot-proof. Open the box. Place the box on a window sill where it'll get some sun. Use the mister bottle to spray water on the soil twice a day. In about 10 days, you'll have a crop of mushrooms ready to harvest! Once you've harvested all you can from your kit, use the growth material in your garden. It'll add nutrients to your other plants. Everything in this kit is made from recycled materials and is itself recyclable, so it's the perfect green gift for the food lover in your life.

COSTS: Rs.1500

o MERITS:

- ☐ Easy and fast to grow.
- ☐ Portable.
- ☐ Soil inside is 100% recycled coffee grounds.
- ☐ Multiple crops (at least 2, but maybe as many as 4!).

o DEMERITS:

- ☐ It has limited supply of mushrooms.
- ☐ Major disadvantage of growing mushroom inside is the odd smell that can permeate your home.
- ☐ Another disadvantage of growing mushrooms inside is that you need to constantly regulate the temperature.
